

IPWSO 2022 CLINICAL AND SCIENTIFIC POSTER DIRECTORY

Categories: C - Clinical Trials for Hyperphagia and Behaviour | E - Endocrinology

G - Genetics, Epigenetics and Animal Models | GN - Gastrointestinal Issues and Nutrition

M - Recent Advances and New Knowledge in Medical Issues

N - Neuroscience, Mental Health and Behaviour | P - The Early PWS Phenotype | T - Transition into Adulthood

We request that people stand by their posters accordingly: Those with odd numbered abstracts stand by their posters for the first hour and those with even numbered abstracts will stand by their posters for the second hour EXCEPT for Day 1 for the people in the [Clinical Trials section](#) who will be attending the Clinical Trials Consortium (CTC). They instead will stand by their posters for the first hour for Day 1 irrespective of their abstract number. Day 2 will follow the typical odd/even instructions.

Category	Presenting Author	Abstract Title	#
Genetics, Epigenetics and Animal Models			
G	de Gouveia Buff Passone, C	Prader-Willi syndrome with unusual genetic findings: case series from a Brazilian reference center.	1
G	Juriaans, A	Temple syndrome: clinical findings and body composition.	2
G	Juriaans, A	The Prader-Willi phenotype and atypical 15q11.2-q13 deletions.	3
G	Power, C	Incidence of Prader-Willi Syndrome and associated burden of medical care in Irish Children.	4
G	Rosenberg, A	Genetic subtype differences in relation to health problems among adults with Prader-Willi syndrome.	5
G	San Vicente Huizar, C	Investigation into the genetic factors of natural variability in Prader-Willi syndrome.	6
G	Segat, D	Update by deep analyses of Prader-Willi subjects with qualitative and quantitative methods.	7
G	Tsai, L.P	Post-stress anxiety response is abnormal in necdin-deficient mice, an animal model of Prader-Willi syndrome.	8
G	Wilson, R	Hypothalamic stem cell modelling of neuronal dysfunction in Prader-Willi Syndrome.	9
Endocrinology			
E	de Gouveia Buff Passone, C	As early as possible: Brazilian experience according to the age at the onset of rhGH at a PWS specialized clinic.	10
E	Casamitjana, L	One year of growth hormone (GH) treatment in adults with Prader-Willi Syndrome improves body composition, motor skills and brain functional activity in the cerebellum.	11
E	Grugni, G	Serum Irisin concentration and glucose metabolism in pediatric patients with Prader Willi Syndrome.	12
E	Margaliot-Kalifa, T	The importance of gynecological examination in PWS patients.	13
Clinical Trials for Hyperphagia and Behaviour			
C	Bolding, S	Preliminary Findings from the Final Qualitative Interview with Caregiver Participants in a PWS Outcomes Assessment of DCCR.	14
C	Dimitropoulos, A	The Benefits of Social-Cognitive Intervention through Play: Updates from the PRETEND Intervention Program.	15
C	Goldstone, A	SCOUT-015: Update on Global, Randomized, Double-blinded, Placebo-controlled, Seamless Phase 2/3 Study of Synthetic Cannabidiol (CBD) Oral Solution in Prader-Willi. Syndrome.	16
C	Helwak, A	The role of SNORD15 and SNORD116 clusters in neuronal differentiation and the development of Prader-Willi syndrome.	17
C	Liu, S	CSTI-500 – a novel triple reuptake inhibitor for the management of symptoms associated with PWS: delivery via a unique, individualized, PK-guided dosing approach.	18
C	Postal, V	Feasibility and tolerance of Transcranial Stimulation in Adults with Prader-Willi syndrome - PRACOM 2.	19

Category	Presenting Author	Abstract Title	#
Clinical Trials for Hyperphagia and Behaviour - Continued			
C	Roof, E	Intranasal Carbetocin Reduces Hyperphagia and Behavioral Distress in Prader-Willi Syndrome: Results from the CARE-PWS Double-Blind Randomized Placebo-Controlled Phase 3 Trial.	20
C	Strong, T	Comparing hyperphagia and problem behaviors in participants with Prader-Willi syndrome (PWS) receiving Diazoxide Choline Extended-Release (DCCR) with matched participants in PATH for PWS (PfPWS).	21
C	Szepes, B	The potential role of MCHR-1 antagonism in the treatment of PWS: non-clinical findings with RGH-706, an MCHR-1 antagonist.	22
The Early PWS Phenotype			
P	Grootjen, L	Prenatal and neonatal characteristics of children with Prader-Willi Syndrome.	23
Neuroscience, Mental Health and Behaviour			
N	Deest-Gaubatz, S	The current state of care of mental health issues in German Individuals with Prader-Willi syndrome.	24
N	de Gouveia Buff Passone, C	The Interaction Between Polysomnographic Findings, Genetic Pattern and Upper Airway Anatomy in Prader-Willi Syndrome.	25
N	Diene, G	Feasibility and tolerance of a non-pharmaceutical treatment for emotional control related to behavioural disorders in Prader-Willi Syndrome : the transcutaneous vagus nerve stimulation (t-VNS) – PRACOM 1.	26
N	Esteba-Castillo, S	Upper Limb Praxis vs. Visuo-constructive Praxis Performance in Adult Prader Willi Syndrome Patients.	27
N	Eberlein, C	Psychopharmacological Treatment in Prader-Willi Syndrome – Experiences from an Outpatient Department for Mental Health.	28
N	Forer, D	Functioning and behavior in adults with PWS in residential hostels versus living at home.	29
N	Forster, J	Acceptance and Commitment Training (ACT) to Reduce Stress in Fathers of Adolescents with PWS.	30
N	Forster, J	Phenomenology and Management of Self-Injurious Behavior Occurring Among Persons with PWS.	31
N	Garcia-Alcaraz, E & Licerias, J	The representation of language in the mind of monolingual and bilingual	32
N	Joga-Elvira, L	Cognitive and adaptive effects of early growth hormone treatment in Prader-Willi Syndrome patients: a cohort study.	33
N	Lipiec, K	Listening to people living with PWS across the world.	34
N	Postal, V	Training planning abilities of adults with Prader-Willi Syndrome.	35
N	Rubin, D	Evaluation of the implementation of a game-based at home physical activity intervention for young children with PWS.	36
N	Rubin, D	Will I fall? Deficits in sensorimotor reception and integration processes that affect postural control in persons with PWS.	37
N	Singh, D	Abnormal Response Monitoring in Prader-Willi Syndrome: A Novel Phenomenological Explanatory Model with Mechanistic Insights.	38
N	Stegmann, J	Bodyweight associated with Valcote and risperidone, in patients with Prader Willi Syndrome.	39
N	Stegmann, J	Mental Health Impact in Prader Willi Syndrome Caregivers.	40
N	Stegmann, J	Description of the neuropsychological profile of PWS.	41
N	Valette, M	Foot Reflexology in children with Prader Willi Syndrome.	42
N	Yamada, K	Differential volume reductions in the subcortical, limbic, and brainstem structures associated with behavior in Prader-Willi syndrome.	43

Category	Presenting Author	Abstract Title	#
Recent Advances and New Knowledge in Medical Issues			
M	Buono, S	The Oasi Research Institute Model: A multidisciplinary approach to the diagnosis and management of individuals with Prader-Willi Syndrome.	44
M	Grugni, G	A Registry for the Evaluation of Patient Outcomes: The Italian Prader-Willi Syndrome Experience.	45
M	Parkanyi, R	Everyday challenges of families of children living with Prader-Willi Syndrome.	46
M	Rees, S	An evaluation of the experiences with services in South Wales for children and young people and their families with PWS.	47
M	Rochedy, A	Food socialization: Interdisciplinary research program to understand eating disorders in PWS.	48
M	Rujedawa, T	Evaluation of the IPWSO ECHO programme with a focus on the Leadership ECHO.	49
M	Stegmann, J	Remote Care of Individuals with Prader Willi Syndrome.	50
M	Thomas, A	Pilot Investigation of Wearable Devices Use In Children With Prader-Willi Syndrome (PWS).	51
Gastrointestinal Issues and Nutrition			
GN	Fintini, D	Multicentric Italian case-control study on 25OH vitamin D in pediatric and adolescents with Prader-Willi syndrome.	52
GN	Hutchinson, I	Energy Requirements for Weight Loss in Adults- time to Reexamine.	53
GN	Melati, W.P	Internalization and Operationalization of Food Social Norms in Children with Prader-Willi Syndrome: Exploration in Malaysia.	54
GN	Stegmann, J	The feasibility of improving nutritional values in Prader Willi Syndrome.	55
GN	Stegmann, J	Prader Willi Syndrome Body Image Perception.	56
Transition to Adulthood			
T	Crino, A	Which model for the transition of patients with Prader-Willi Syndrome? The experience of a reference center for adults.	57
T	Timmermans, D	Three years of growth hormone (GH) treatment in young adults with PWS previously treated with GH during childhood: Effects on cognitive functioning.	58
